EXPERIENCE

Microsoft Azure, Cloud + AI San Francisco, CA
Software Engineer – Backend, Distributed Systems Jun 2024 — Present

- Led a horizontal scale out of Azure Resource Graph's ingestion pipeline to process **3.4x more traffic** and **25B events/day**, by adopting Premium Azure Event Hubs across **127 global clusters** with IaC (Azure Bicep/ARM) rollouts
- Delivered compliant EU Data Boundary ingestion routing across **28 customers** making **130k requests/day** by introducing **geographic partitioning** and **regional data residency isolation**
- Investigated and resolved over 117 customer-impacting incidents for government and F500 customers through **CPU/memory profiling** and **application-layer tracing** with KQL, ETW collection, PerfView and Azure Monitor
- Addressed bursty traffic for 2 of the pipeline's core ingestion services in 23 fault-isolated clusters across 5 global regions by vertically scaling VM nodes through **CPU-threshold autoscaling** to **relieve consumer backpressure**
- Eliminated read/write race conditions for **40M daily blob payloads** by decoupling diagnostic timestamps from naming creation and introducing GUID-based identifiers for **concurrency-safe uniqueness** in C#/.NET
- Onboarded Apache Spark NDJSON batch processing to production with zero downtime by extending the ingestion contract with **async streaming deserialization** and **partition-aligned batching** for optimized downstream indexing
- Reduced infrastructure capacity review time for dozens of engineers from days to minutes by developing an infrastructure visualizer in React and TypeScript which parses **1.9k resources** across **177 IaC files** in real-time

Walt Disney Animation Studios Burbank, CA
Software Engineer Intern – Full-Stack May 2023 — Aug 2023

- Built an **animation clip metadata application** adopted by over **85 production managers** and used on **every Disney Animation film production since 2024** with React, TypeScript, FastAPI, GraphQL and the Autodesk ShotGrid API
- Automated ingestion of **terabytes of cross-department production data** into Snowflake for internal analytics and reporting, by building pipelines with Python, Apache Airflow and AWS SDK

Software Engineer Intern – Full-Stack May 2022 — Aug 2022

- Shipped **12 features, hotfixes and JavaScript-to-TypeScript refactors** to internal film production software and employee management tools with React, Django, GraphQL and Document Object Model (DOM) testing
- Kept employee records consistent across internal systems through **automated profile-metadata syncs** by building Python and Apache Airflow pipelines over REST APIs, MySQL, and Ruby on Rails

PROJECTS AND PUBLICATIONS

Runlab (*App Store:* `https://apps.apple.com/us/app/runlab-ai/id6760689466`) 2026

- Built and shipped an AI running coach iOS app to the App Store that reasons over on-device Apple Health data and a persistent coach memory, using SwiftUI, SwiftData, HealthKit, the Claude API, Cloudflare Workers, and Supabase

Heaptree (*Project:* `https://pypi.org/project/htsdk/`) 2025

- Built a Python SDK and API for isolated, ephemeral code execution that provisions headless Linux VMs with one line of code, using React, Next.js, TypeScript, Python, and AWS (EC2, DynamoDB, Lambda)

Comparative Study of Text-to-Image Models: A Focus on Subject-Specific Training for Improved Generation (*Publication:* `https://scholarworks.calstate.edu/concern/projects/pz50h376p`) 2023

- Improved subject fidelity in text-to-image generation, measured through a comparative evaluation of performance trade-offs, by applying subject-specific fine-tuning (LoRA) to Stable Diffusion 1.1

TECHNICAL SKILLS

- **Languages:** Python, C#, TypeScript/JavaScript, KQL, SQL, PowerShell, GraphQL
- **Cloud & Infrastructure:** Azure (VM Scale Sets, Blob Storage, Event Hubs, Service Fabric, Monitor, DevOps), AWS (EC2, S3, Lambda), Cloudflare (Workers, D1, R2), Infrastructure as Code, Vercel, GitHub Actions, ETW Tracing, PerfView
- **Data & Storage:** PostgreSQL, Cosmos DB, DynamoDB, MySQL, Redis, Snowflake, Apache Airflow
- **Frameworks:** .NET, ASP.NET Core, React, REST APIs, Next.js, FastAPI, TanStack, Django, Express

EDUCATION

California State University, Long Beach Long Beach, CA
B.S. Computer Science (GPA: 3.8/4.0) Aug 2020 — Dec 2023
